## Summary

Hello I'm Rodrigo and I'm a software developer from Argentina. I have been working as a developer for more than 14 years, so I've had the opportunity to work with many technologies and specialize in the ones I like the most!  My main skills are: Python, javascript, html5, css.  I specialize in web development and I've worked with complex deployments on python and javascript using frameworks like Django, Angular.js and Bootstrap on cloud infrastructures like Amazon.   I have experience working with different database engines like MySql Postgres, MS-SQL Server, Oracle and mongodb.  I've also worked on mobile platforms, creating native applications for Android.  When I started I used to work with languages like C, C#.NET, VB.NET, ASP.NET, PHP5, SQL Trans, VB 6. I'm not working with them right now but I sure know how to do it.  I have experience working with desktop apps for different projects  in areas like administration, field, etc. I know how to work with frameworks like QT and .NET.   You can check my personal website and find more information about the projects I'm working on. Click here: http://carrerasrodrigo.com.ar/  Here there are some of the technologies I use on a daily basis: Python, Django, Pylons, HTML5, CSS3, JavaScript, less, Amazon clouds, Mysql, Sqlite, Postgres, mongo, SQL Server, Android, Angular.js, photoshop, nodejs, etc

---

## Experience
